

Testing scripts

This document covers the testing performed against the python algorithm assignment. It will cover test scenarios and evidence for searching/reading data, writing new records, deleting, updating and restoring records. The testing covers the following functionality:

- enter at least five records
- delete and search records based on keyword/string entry
- sort records in a specific order and display them on the screen
- select an option on the screen to perform a function
- get a prompt on screen before an action is performed

Requirements:

001	Application must display ID and summary values of toolkits in a list
002	Application must write a log each time data is loaded to a list
003	Application must display all data for each record
004	Application must be able to write several records
005	Application must allow the update of records
006	Application must allow a record to be marked as deleted
007	Application must be able to restore records from deleted
008	Application must write a log on deletion
009	Application must write a log on restore
010	Application must write a log on insert
011	Application must write a log on update
012	Application must write a log if incorrect number of records is submitted
013	Application must refresh listview after each transaction
014	Application must run on one form
015	Application should only use standard python libraries

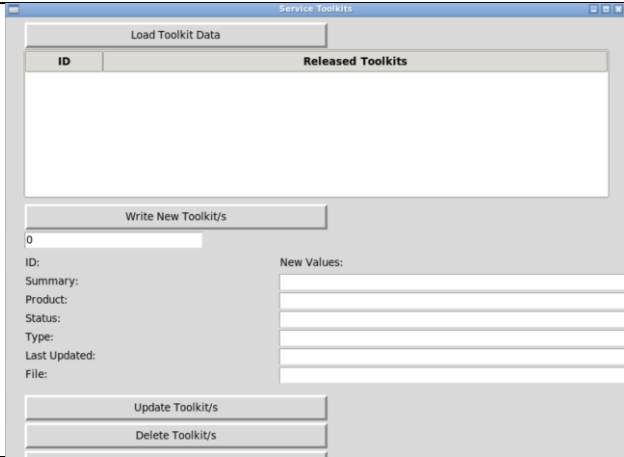

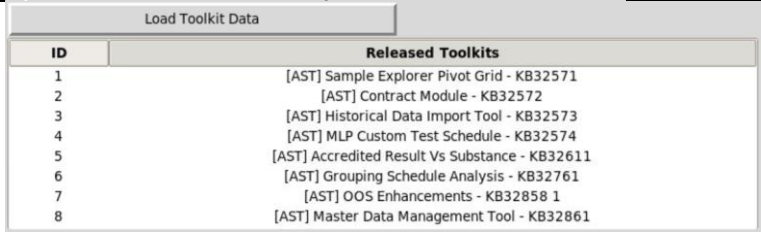

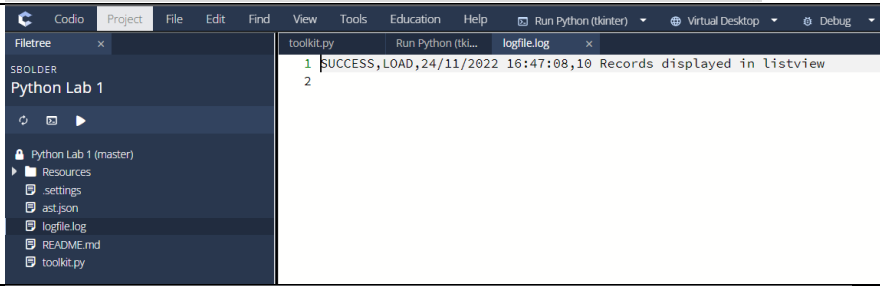

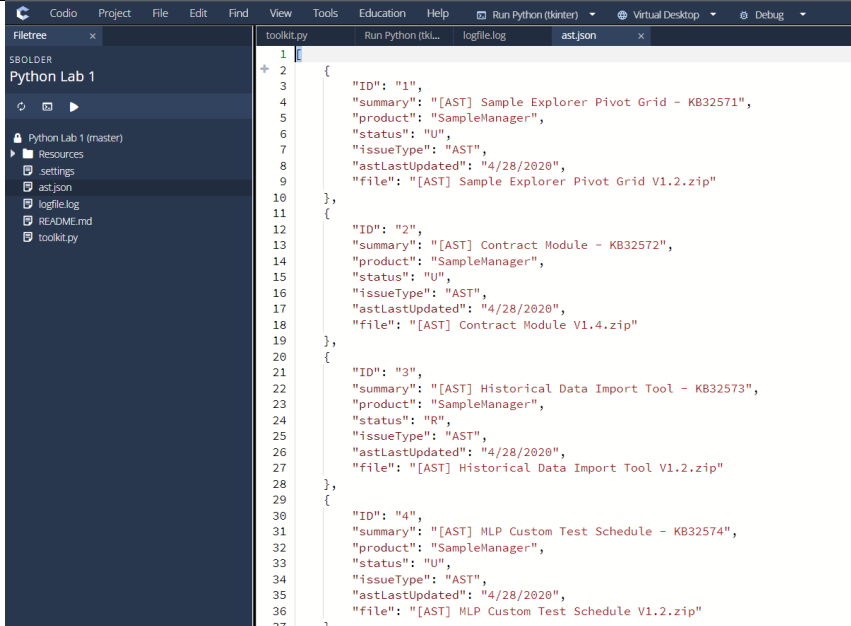

Test 1:

Test 1 covers reading data into the application

Requirements: 001, 002, 014, 015

ID	Test Case
1	Read Data A. Load application B. Click 'Load Toolkit Data' button to load data to listview C. Review logfile to check number of records displayed D. Review JSON file to check records match listview data

ID	Step	Result
----	------	--------

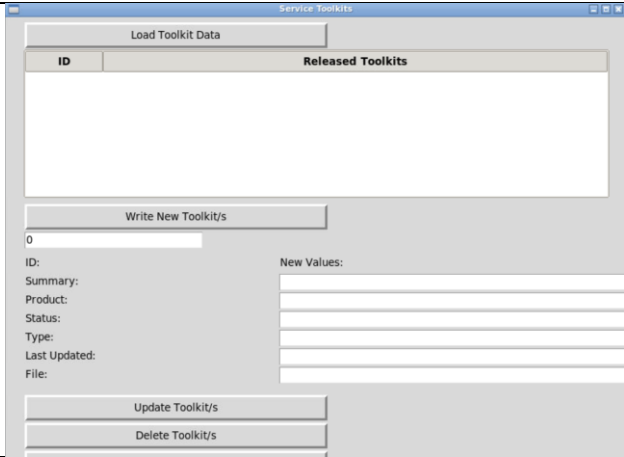

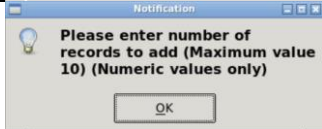

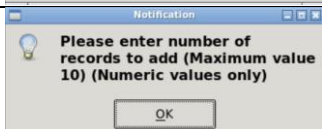

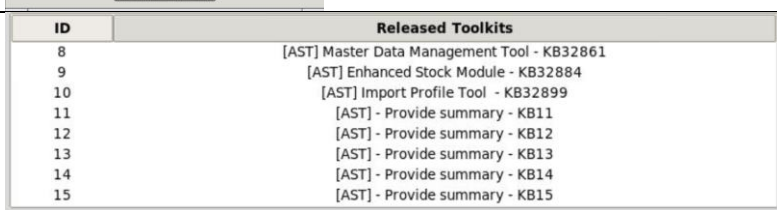

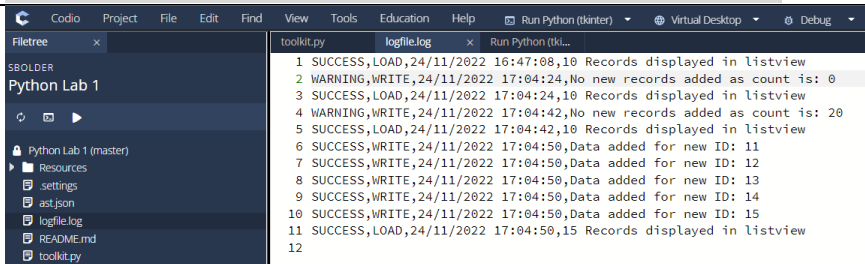

1	A:		Pass
	B:		Pass
	C:		Pass
	D:		Pass

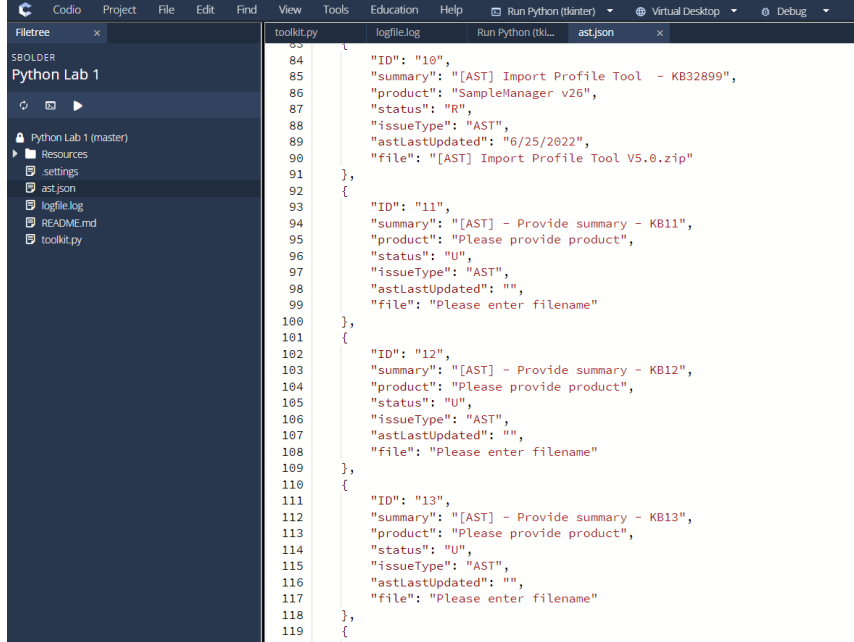

Test 2:

Test 2 covers inserting new records into the JSON file.

Requirements: 001, 002, 004, 005, 010, 012, 013, 014, 015

ID	Test Case
2	<p>Insert New Data</p> <p>A. Load application</p> <p>B. Click 'Write New Toolkit's' button with default value 0</p> <p>C. Click 'Write New Toolkit's' button with value > 10</p> <p>D. Click 'Write New Toolkit's' button with value between 1 and 10</p> <p>E. Review logfile to check number of records displayed</p> <p>F. Review JSON file to check records match listview data</p>

ID	Step		Result
2	A:		Pass
	B:		Pass
	C:		Pass
	D:		Pass
	E:		Pass

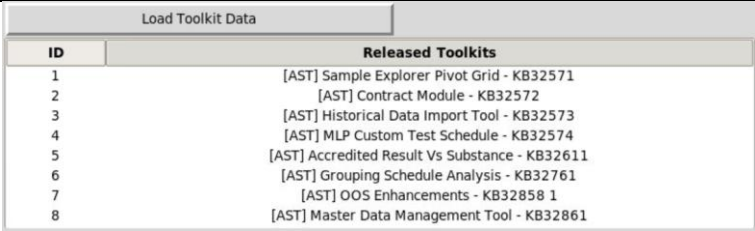

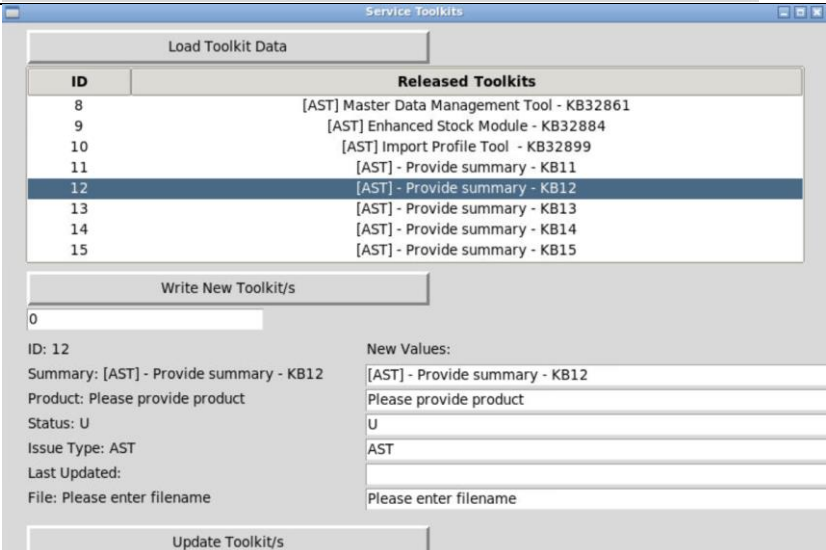

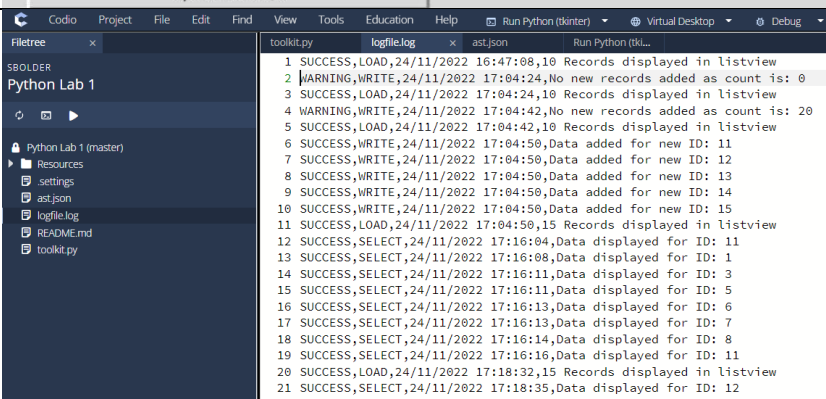

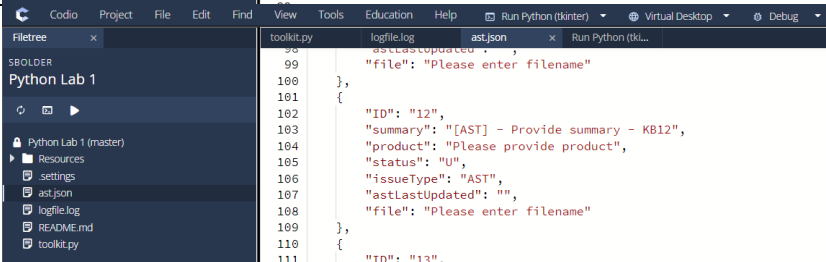

F:		Pass
----	--	------

Test 3:

Test 3 covers searching records in the JSON file to display the data.
Requirements: 001, 002, 003, 013, 014, 015

ID	Test Case
3	<p>Search Data</p> <ol style="list-style-type: none"> Load application Click 'Load Toolkit Data' button to load data to listview Click on a row in the listview and check label and input controls display the data for selected record Check log file for search entry Check JSON to check data on form matches content

ID	Step		Result
3	A:		Pass

	B:		Pass
	C:		Pass
	D:		Pass
	E:		Pass

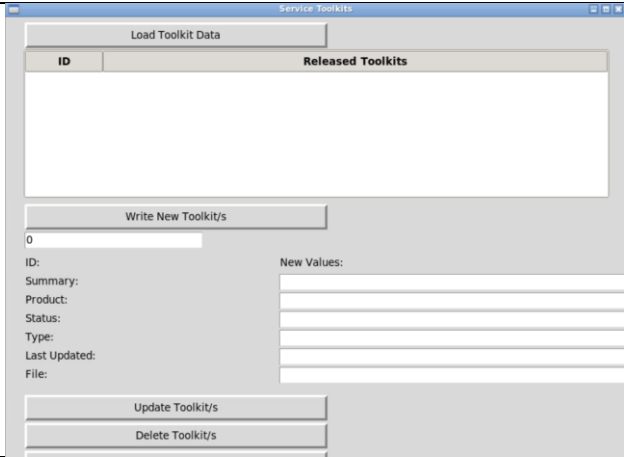

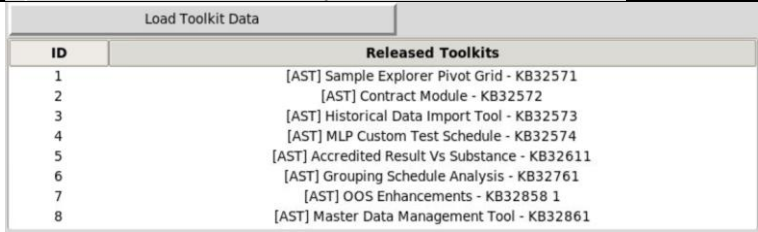

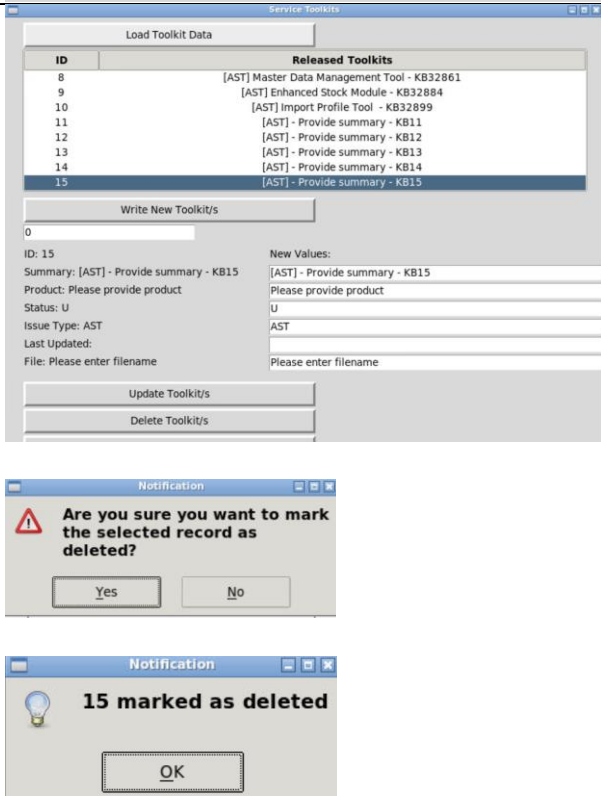

Test 4:

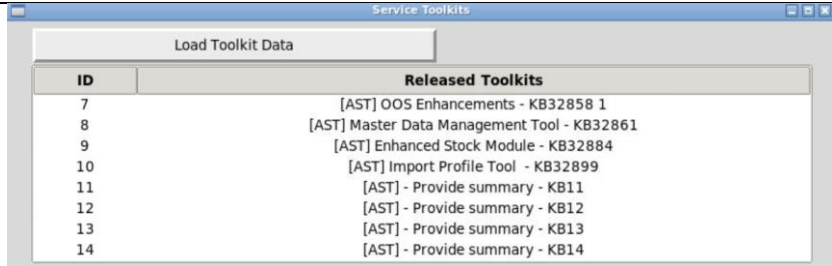

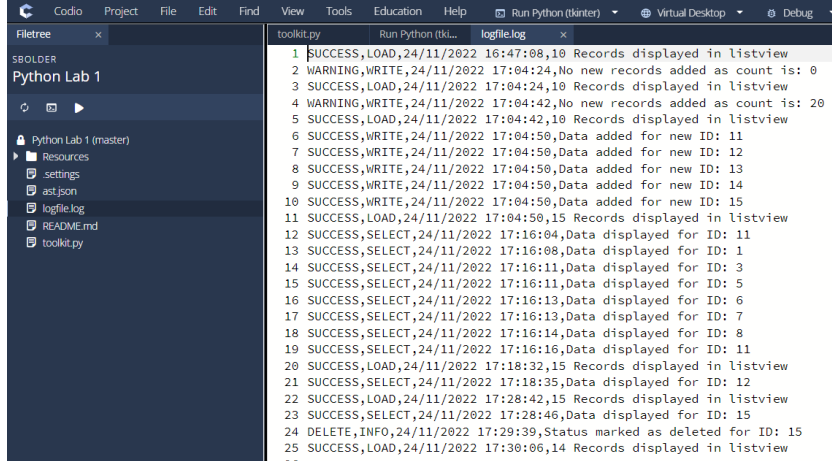

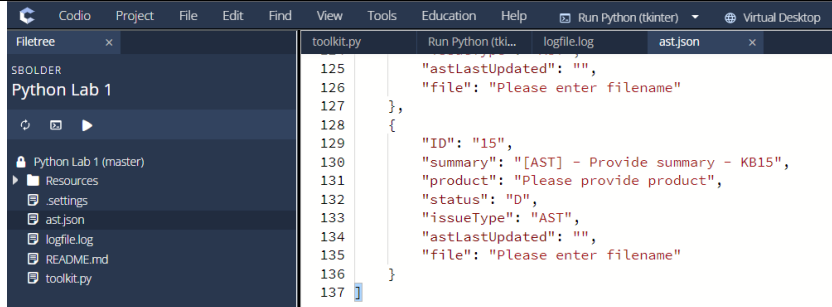

Test 4 covers deleting a record.

Requirements: 001, 002, 005, 006, 008, 013, 014, 015

ID	Test Case
4	Delete Data A. Load application B. Click 'Load Toolkit Data' button to load data to listview

	<p>C. Click on a row in the listview and click the 'Delete Toolkit/s' button</p> <p>D. Check listview does not display the deleted record</p> <p>E. Check log file for deletion</p> <p>F. Check JSON to verify record is marked as D</p>
--	--

ID	Step		Result
4	A:		Pass
	B:		Pass
	C:		Pass

	D:		Pass
	E:		Pass
	F:		Pass

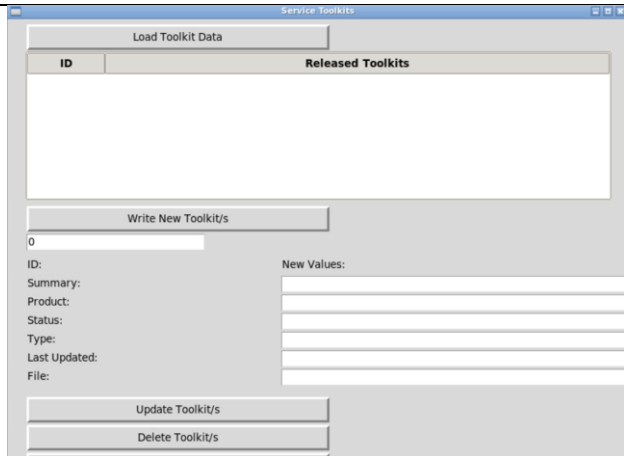

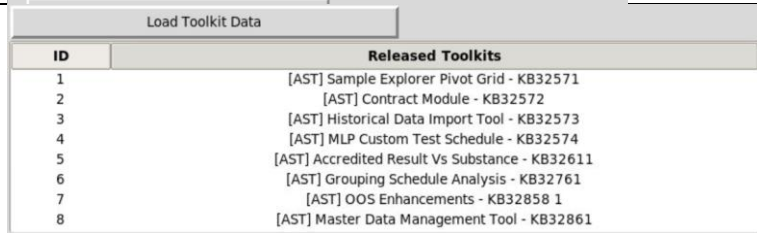

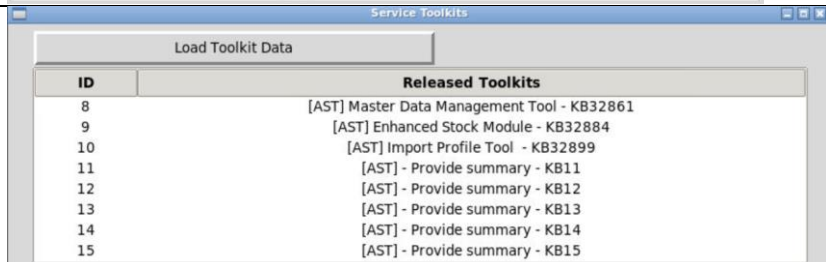

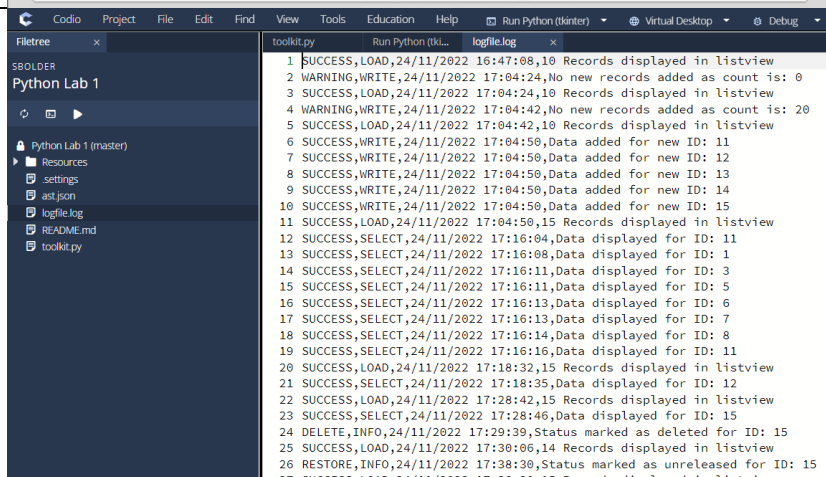

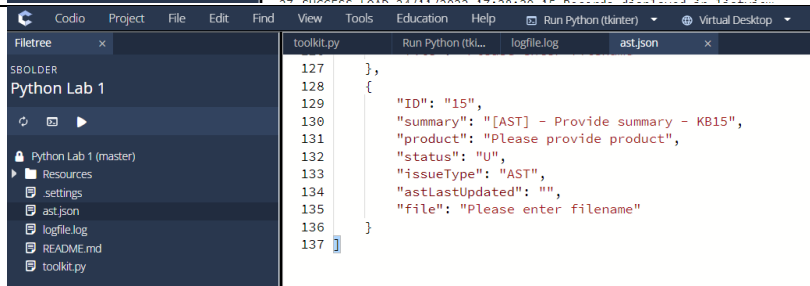

Test 5:

Test 5 covers restoring a deleted record.

Requirements: 001, 002, 005, 007, 009, 013, 014, 015

ID	Test Case
5	Delete Data <div> A. Load application B. Click 'Load Toolkit Data' button to load data to listview C. Click on the 'Restore Deleted Toolkit/s' button and check listview display's previously deleted record D. Check log file for restore E. Check JSON to verify record is marked as U </div>

ID	Step	Result
----	------	--------
